

magnetiz.ai Brand Guide

v1.0 – February 2026 – Terminal Design System

This guide defines the visual identity, design language, and component standards for magnetiz.ai. Our aesthetic is rooted in the IDE/terminal experience — precise, technical, and intentionally engineered. Every element should feel like it belongs in a developer's workspace.

Logo & Wordmark

The magnetiz.ai wordmark is set in JetBrains Mono Bold at 20px (nav) or 28px (display). The ".ai" portion is always rendered in Steel Blue (#4A9ECE). The logo is text-only — no icon, no symbol.

Primary Variants

The wordmark "magnetiz.ai" is displayed in a bold, monospaced font. The text "magnetiz" is white, and ".ai" is Steel Blue. It is centered within a dark gray rounded rectangle.

magnetiz.ai

On dark background (primary)

The wordmark "magnetiz.ai" is displayed in a bold, monospaced font. The text "magnetiz" is white, and ".ai" is Steel Blue. It is centered within a medium gray rounded rectangle.

magnetiz.ai

On surface background

The wordmark "magnetiz.ai" is displayed in a bold, monospaced font. The text "magnetiz" is white, and ".ai" is Steel Blue. It is centered within a light gray rounded rectangle.

magnetiz.ai

On light background (exception use)

Specifications

PROPERTY	VALUE
Font	JetBrains Mono, 700 weight

PROPERTY	VALUE
Nav size	20px
Display size	28px
Letter spacing	-0.5px
Casing	All lowercase — always <code>magnetiz.ai</code>
Accent color	<code>#4A9ECE</code> applied to ".ai" only
Minimum clear space	Equal to the height of the letter "m" on all sides

Do

- ✓ Always lowercase: `magnetiz.ai`
- ✓ Keep ".ai" in Steel Blue on dark backgrounds
- ✓ Use JetBrains Mono exclusively for the wordmark
- ✓ Maintain minimum clear space around the logo

Don't

- ✗ Capitalize: Magnetiz.AI, MAGNETIZ.AI
- ✗ Change the accent color of ".ai"
- ✗ Use a different typeface for the wordmark
- ✗ Add drop shadows, outlines, or effects to the logo

02

Color System

Our palette is inspired by modern code editor themes — syntax highlighting colors on deep, dark backgrounds. Steel Blue is the primary

brand accent. Coral signals warnings or emphasis. Green indicates success or active states.

var(--border-accent)
```

03

Typography

We use a two-font system: JetBrains Mono for headings, labels, code, and UI accents. DM Sans for body copy and long-form text. This pairing creates a technical-yet-readable experience.

DISPLAY / HEADINGS

JETBRAINS MONO — 300–800

Status Bar	JetBrains Mono	11px	400	1

ELEMENT	FONT	SIZE	WEIGHT	LINE HEIGHT
Stat Numbers	JetBrains Mono	<code>clamp(48px, 7vw, 80px)</code>	800	1

04

Spacing & Layout

Spacing is generous and deliberate. Sections breathe with 120px vertical padding on desktop, 80px on mobile. Content is contained within a 1200px max-width container.

Section Spacing

CONTEXT	DESKTOP	MOBILE (768PX)
Section padding (vertical)	<code>120px</code>	<code>80px</code>
Section padding (horizontal)	<code>24px</code>	<code>20px</code>
Container max-width	<code>1200px</code>	
Hero padding	<code>120px 24px 80px</code>	<code>100px 20px 60px</code>
Card padding	<code>36px 32px</code>	<code>28px 20px</code>
Grid gap (services)	<code>24px</code>	<code>24px</code>
Grid gap (stats)	<code>32px</code>	<code>32px</code>

Grid System

COMPONENT	DESKTOP	TABLET (1024PX)	MOBILE (768PX)
Hero	<code>1fr 1.15fr</code> (2-col)	<code>1fr</code>	<code>1fr</code>
Services	<code>repeat(2, 1fr)</code>	<code>1fr</code>	<code>1fr</code>
Stats	<code>repeat(3, 1fr)</code>	<code>1fr</code>	<code>1fr</code>
Footer	<code>2fr 1fr 1fr 1fr</code>	<code>1fr 1fr</code>	<code>1fr</code>

Border Radius

TOKEN	VALUE	USAGE
<code>--radius</code>	<code>12px</code>	Cards, terminals, panels
Button radius	<code>8px</code>	Primary and ghost buttons
Tag radius	<code>4px</code>	Small labels, tags
Icon container	<code>12px</code>	Service icon backgrounds

Effects & Atmosphere

The brand uses subtle blue glows, grid patterns, and syntax-highlighting colors to create an immersive IDE atmosphere. Effects should enhance, never distract.

Glow System

`--glow-sm`
Subtle resting
state

`--glow-md`
Cards &
terminals

`--glow-lg`
Hover & focus

TOKEN	VALUE	USAGE
<code>--glow-sm</code>	<code>0 0 15px rgba(74, 158, 206, 0.08)</code>	Subtle ambient glow
<code>--glow-md</code>	<code>0 0 30px rgba(74, 158, 206, 0.12),</code> <code>0 0 60px rgba(74, 158, 206, 0.04)</code>	Terminal chrome, card resting state
<code>--glow-lg</code>	<code>0 0 40px rgba(74, 158, 206, 0.2), 0</code> <code>0 80px rgba(74, 158, 206, 0.06)</code>	Hover states, emphasis

Background Textures

ELEMENT	DESCRIPTION
Grid Background	Fixed dot grid — <code>radial-gradient(circle, rgba(74,158,206,0.07) 1px, transparent 1px)</code> at <code>32px</code> intervals

ELEMENT	DESCRIPTION
Hero Glow	Centered radial gradient ellipse, <code>1000px × 800px</code> , blue at 6% opacity fading to transparent
Section Dividers	Horizontal gradient line — <code>transparent → Steel Blue → transparent</code> at 20% opacity
Nav (scrolled)	Background <code>rgba(13,17,23,0.92)</code> with <code>backdrop-filter: blur(20px)</code>
Editor Gutter	Left-edge line numbers, visible on desktop (1024px+), adds IDE depth

Animation

EFFECT	SPECIFICATION
Scroll Reveal	<code>opacity 0→1, translateY(32px→0)</code> — <code>0.7s cubic-bezier(0.16, 1, 0.3, 1)</code>
Stagger Delays	<code>0.1s, 0.2s, 0.3s, 0.4s</code> for sequential reveals
Card Hover Lift	<code>translateY(-4px)</code> with glow intensification — <code>0.35s ease</code>
Button Hover	<code>translateY(-2px)</code> with glow — <code>0.25s ease</code>
Cursor Blink	Blue block cursor, <code>1s step-end infinite</code> opacity toggle
Typing Effect	Character-by-character reveal with syntax highlighting, 30–60ms per character
Stat Counter	Numbers count up from 0 on scroll into viewport

EFFECT

SPECIFICATION

Ticker
Carousel

Horizontal infinite scroll, `40s linear infinite`, pauses on hover

06

Components

All major UI components follow the terminal/IDE metaphor. Terminal chrome (header with traffic light dots, title bar, status bar) is the primary container pattern used throughout the site.

Terminal Chrome

Terminal Window

Header (40px) + body + status bar (28px). Traffic light dots: #FF5F56, #FFBD2E, #27C93F.

Service Title

Description text in DM Sans at secondary color.

tag_label

Service Card

Gradient top-border on hover. Icon in blue-dim bg. Green tag label.

85%

of AI projects fail without evaluation frameworks

Stat Card

Large monospace number in accent color. Body text in secondary.

Custom
Agents

>

Generic
~~Tools~~

Manifesto Row

Good value in primary text. Arrow in muted. Bad value struck-through in coral at 55%.

Buttons & CTAs

Buttons use JetBrains Mono for a technical feel. Two variants: primary (filled blue) and ghost (outlined). Both lift on hover with a subtle glow effect.

Primary Button

Steel Blue bg, white text, 14px/600 JetBrains Mono, 14px 28px padding, 8px radius

Ghost Button

Transparent bg, default border, primary text. Border turns blue on hover.

Button Specifications

PROPERTY	PRIMARY	GHOST
Background	#4A9ECE	transparent
Text color	#FFFFFF	#E6EDF3

PROPERTY	PRIMARY	GHOST
Border	None	1px solid #30363d
Font	JetBrains Mono, 14px, weight 600 / 500	
Padding	14px 28px	
Border radius	8px

Hover: bg (primary)	#5ab0de	—
Hover: border (ghost)	—	#4A9ECE
Hover: glow	0 0 24px rgba(74,158,206,0.35)	0 0 15px rgba(74,158,206,0.1)
Transition	all 0.25s ease	
Mobile width	100% (full width, stacked)	

Voice & Tone

Magnetiz.ai speaks like a senior engineer — precise, confident, and no-nonsense. We use technical language comfortably but never gatekeep. The tone is direct and outcome-focused.

Voice Attributes

ATTRIBUTE	DESCRIPTION
Technical	We speak the language of engineering — evaluation frameworks, production deployment, edge cases, confidence scores.
Evidence-based	Claims are backed by data and specific outcomes. No vague promises or hype.
Direct	Short sentences. Active voice. We say what we mean without hedging.
Confident	We stand behind our work. "If we can't show a clear path to ROI — you don't pay."

Writing Patterns

HEADLINES

We build AI agents that work in production

Short. Declarative.
Outcome-focused. Use JetBrains Mono. Accent key words in Steel Blue.

SECTION LABELS

// The Problem
// The Solution

Code-comment style
prefixed with `//` in Sage Green. Always uppercase first letter.

CONTRASTS

Evidence-Based > ~~Vibes-Based~~

Custom Agents > ~~Generic Tools~~

Good value in white, bad value struck-through in coral. Creates immediate differentiation.

CTAS

magnetiz.ai \$ start --ai-audit

Terminal-style command prompts for CTAs. The action feels like running code, not clicking a marketing button.

Write like this

- ✓ "Production-ready in less than 30 days"
- ✓ "We deploy automated testing infrastructure"
- ✓ "95% of enterprises run AI pilots. Only 11% reach production."
- ✓ "If we can't show a clear path to ROI — you don't pay."

Not like this

- ✗ "Unlock the power of AI for your business"
- ✗ "Our innovative solutions leverage cutting-edge technology"
- ✗ "Transform your enterprise with next-gen AI capabilities"
- ✗ "Schedule a free consultation to learn more"

Usage Guidelines

Quick reference for maintaining brand consistency across all touchpoints — website, presentations, social, and documentation.

Hierarchy of Elements

LAYER	COLOR	USAGE
Page background	<code>--bg-deep</code> #0d1117	Always the base layer
Card / Panel	<code>--bg-surface</code> #161b22	Cards, terminals, nav (scrolled)
Header / Status bar	<code>--bg-elevated</code> #1c2333	Terminal chrome, elevated UI
Tag background	<code>--bg-card</code> #21262d	Small inline elements, tags

Color Usage Rules

COLOR	ROLE	WHERE
Steel Blue	Primary action, links, emphasis	Buttons, logo accent, hover states, section accents
Coral	Warning, negation, contrast	Stat numbers, strikethrough text, error states
Sage Green	Success, active, labels	Status indicators, section labels, tags, "ready" states
Amber	Caution, attention	Warning icons, status messages

COLOR	ROLE	WHERE
Purple	Code keywords only	Syntax highlighting in terminal blocks
Cyan	Code built-ins only	Syntax highlighting in terminal blocks
Orange	Code numbers only	Syntax highlighting in terminal blocks

Presentation Slides

Do

- ✓ Use #0d1117 or #161b22 backgrounds
- ✓ Set headings in JetBrains Mono Bold
- ✓ Use the syntax color palette for data viz
- ✓ Include terminal chrome for code/data blocks
- ✓ Keep the grid dot pattern as a subtle texture

Don't

- ✗ Use white or light backgrounds
- ✗ Substitute Arial, Helvetica, or other fonts
- ✗ Use gradients not defined in the palette
- ✗ Add stock photography or generic AI imagery
- ✗ Use rounded, bubbly, or "friendly" UI patterns

Asset Checklist

ASSET	FORMAT	NOTES
Primary font	Google Fonts	JetBrains Mono — weights 300, 400, 500, 600, 700, 800
Body font	Google Fonts	DM Sans — weights 300–700, italic

ASSET	FORMAT	NOTES
CSS variables	CSS custom properties	All tokens defined in <code>:root</code> of <code>terminal.css</code>
Icon system	Inline SVG	Feather-style icons, 24px, <code>stroke-width: 2</code> , <code>currentColor</code>
Favicon	SVG / ICO	Not yet implemented — recommend monogram "m" in JetBrains Mono
